PREFAB PIPE MAC™ CART

The Prefab Pipe Mac™ Cart streamlines material staging and transportation by providing a customizable platform for straight or bent conduit and other pre-assembled components. Featuring three storage levels and adjustable cross bars, it adapts to a wide range of prefab shop and jobsite needs while keeping materials organized and secure during transport. With a 2,500 lbs. load capacity and easy-access design, the Prefab Pipe Mac™ Cart helps improve efficiency from fabrication to installation.

FEATURES

- Customizable transport and staging solution for straight or bent conduit and prefabricated assemblies
- Secure tie-down points and 2,500 lbs. load capacity support safe transportation
- Three storage levels maximize material organization and space utilization
- Adjustable cross bars accommodate a wide range of conduit sizes and configurations
- Easy-to-remove pins allow quick reconfiguration for changing project needs
- Durable powder coat finish
- 6" heavy-duty casters
