GANG BOXES AND DEVICE PARTITIONS

ZINC PLATED STEEL

FEATURES

- Dividers create a shield between power and low voltage signals that prevents electrical interference and disturbance all the way up to the finished surface

APPLICATIONS

- Partitions/dividers are used to separate low voltage and electrical power devices when they are installed next to each other in a multi-gang box

STANDARD MATERIAL

- Zinc plated steel

CERTIFICATIONS

- UL, cULus Listed (excludes 4, 5, 6 gang)
