## **MATERIAL HANDLING PRODUCTS**

Southwire™ Material handling products offer a wide range of tools to fit any electrical jobsite. Contractors know material handling costs are among the highest on their jobsite. With solutions that include captured spindles, collapsible, and stackable designs our product offering makes any job safer, more efficient, and ultimately more profitable.

## **HOW AND WHY**

Southwire™ started its line of material handling products by teaming up with an electrical contractor that, upon finding out they did not have the right tool for the job, created a line of multi-use wire carts. These products, like the rest of the Southwire™ Equipment Line, have been further developed through years of interactions with customers, on jobsites, and through understanding the needs of today's contractor.

In addition to the wire focused products, Southwire™ has introduced multi-use tools like the Wire Wagon® 550. These products are designed to adapt to any jobsite carrying pipe, ladders, materials, and other miscellaneous good, creating a versatile mobile workstation head and shoulders above similar solutions from other manufacturers.

## **WORK-N-WAGON™**
