

# Southwire™

## **STINGRAY™**

In today's high tech world there is a lot of cable being pulled above drop ceilings, and that cable is fragile and expensive. Snagging cables on the drop ceiling not only ruins the cable but also the ceiling, creating delays and extra costs. That is all a thing of the past with Southwire's Stingray™ Ceiling Grid Wire Pulling Device. Simply remove the ceiling tiles and snap the Wire Pulling Device into the corner of the drop ceiling. That's it! You now have a safe and effective chase to run your cables through any drop ceiling. The Wire Pulling Device protects the cables from becoming tangled with the grid and protects the grid from twisting and marring. When you're finished simply pull the Wire Pulling Device's tail and slide it off the grid.

**PROTECTS EXPENSIVE AND FRAGILE CABLES**

**PROTECTS CEILING FROM TWISTING AND MARRING**

**SMOOTH INTERIOR FOR AN ALMOST FRICTIONLESS CHASE**

**SIDE SLIT ALLOWS FOR EASY CABLE REMOVAL**

**FITS 1" STANDARD CEILING GRID**
