

WELD GAS ANALYZER

The Argo-Naught Weld Gas Analyzer accurately monitors oxygen levels while using inert gas to purge stainless steel, titanium and other reactive metal. The Argo-Naught Weld Gas Analyzer measures oxygen content in the weld chamber down to 0.1% (1000 ppm), helps save on argon gas consumption and increases the welder's production rate.

STANDARD FEATURES

- Hermetically sealed, robust housing
- Air and water-tight
- State of the art electronics
- High measurement accuracy
- Quick response time
- Clear, large display
- Increased sensor life expectancy

PART NO.	DESCRIPTION	WEIGHT
779281	Argo-Naught Weld Gas Analyzer Kit – Includes case, Argo-Naught Analyzer, 2 AA batteries, 6-1/2 foot (2 m) rubber hose, stainless steel probe, rubber vacuum bulb	1.3 lbs (0.6 kg)
