SIMpull® CoilPAK™ WIRE PAYOFF

REVOLUTIONIZING THE WAY YOU INSTALL CIRCUIT WIRE

WE LISTENED:

Moving, setting up, and pulling circuit wire spools can be physically challenging. Spools are bulky, easily breakable, and often result in partial lengths that are difficult to store or become scrap. This leads to an increase in physical effort, manpower, and material required for the job.

SOLUTION:

Work smarter with the SIMpull® CoilPAK™ Wire Payoff by reducing the physical effort associated with material handling, setup, and pulling compared to traditional spools, increasing both safety and productivity on the job.

BENEFITS:

- Stationary package design reduces pulling effort.
- SIMpull NoLube® jacket further reduces pulling tension.
- Designed to help reduce potential lifting/handling/pulling injuries.
- Space saving, multi-wire CoilPAK™ payoffs with striped neutrals for greater efficiency and less handling.
- No more broken spools or spool over-turn.
