

# Bonding Cable

Southwire offers single conductor insulated cables in standard conductor sizes to be used in conjunction with link boxes to complete the desired bonding scheme. Options include cables that are type USE-2/RHH/RHW-2 rated and Underground Transmission Solutions Bonding/Grounding cable meeting AIEC CS9 requirements. Both are abrasion, moisture, heat, fire, and sunlight resistant black cross-linked polyethylene insulated. The copper conductor is annealed and moisture blocked and rated for 90°C normal operation.
