OUR STORY

Sumner, a Southwire Company, is a recognized leading manufacturer of material lifts, jack stands, welding tools, material carts and other tools and equipment for the construction market. We are a key supplier to the welding and mechanical contracting industries and have a market presence in more than 50 countries around the world. We maintain manufacturing and sales operations in Texas, Canada, China, the United Kingdom and the Netherlands.

Founded in 1965, our operations began to meet the need for good welding tools and lifting equipment to make pipe installations easier and safer. Early success in the business led the way for us to continually meet the needs of a wide variety of contractors, and we continue to provide a range of equipment options that promote safety and efficiency on the jobsite.

WELDING HAND TOOLS

At Sumner Manufacturing, our welding customers are very important to us. One of our primary goals as a manufacturer is to provide our customers with high quality, competitively priced tools. Welders are not only our customers, we learn from welders in the field what products are needed to make their jobs easier. These ideas help us to design and build new and better products. In essence, our customers are part of our Research & Development department, and without their input, we would be unable to continually offer great new products.

Another important part of our philosophy at Sumner is our commitment to safety. All Sumner employees are dedicated to the safety of the individuals who use our products. We understand that price is always a concern to our users, but we will never sacrifice quality or safety just to save costs. We know the demands expected of all Sumner products, and each is built for years of use. It could be said that Sumner tools are built the way the welder would make them. As a result, our tools are not only considered the best in the market, but also the most reliable to get the job done efficiently and safely.
