## ZTACSR/VR2® VIBRATION-RESISTANT CABLE

***Putting innovation on the line.***

**VR2® CONDUCTOR** – Southwire Company, LLC's twisted pair conductor design – provides vibration and galloping resistance without the schedule delays associated with bagging problems during installation. Now, Southwire's ZTACSR/VR2 conductor provides higher thermal resistance allowing for greater ampacity without having to increase conductor size.

### ***Get the performance you expect, and more***

**TRUSTED PERFORMANCE** – same anti-galloping and Aeolian vibration-resistant characteristics as ACSR/VR2 conductor

**THERMALLY RESISTANT ALUMINUM-ZIRCONIUM** – proven alloy historically used in other conductor applications

**210°C CONTINUOUS / 240°C EMERGENCY**

**THERMAL RATING** – highest operating temperatures in the industry for twisted pair conductors

**GOOD CONDUCTIVITY** – 60% IACS

**HIGH TEMPERATURE HARDWARE** – uses the same high temperature hardware as ACSS conductor (sizes must be verified by hardware manufacturer). That's why they've designed new features into SAG10 Version 4.1 with you in mind.

**CORROSION-RESISTANT** – extended conductor life through use of a mischmetal steel core coating

**CORE OPTIONS** – available in standard, high-strength and HS285® overhead conductor

**SIZE OPTIONS** – 2 x #4 AWG – 2 x 1113 kcmil

**ADDITIONAL OPTIONS** – trapezoidal-shaped wire (TW), non-specular (NS)

## **Technical Specifications**

### **ZTACSR/VR2® VIBRATION-RESISTANT CABLE**

#### **CONSTRUCTION**

Southwire Company's ZTACSR/VR2 conductor is composed of two identical bare conductors twisted together. This varying profile disrupts the wind forces that cause conductor vibration, which helps to reduce galloping due to ice and wind. ZTACSR/VR2 is available with multiple conductor types, and in sizes up to 2 x 1113 kcmil.

#### **APPLICATIONS**

ZTACSR/VR2 conductor is designed for overhead applications subject to aeolian vibration and galloping due to ice and wind. ZTACSR/VR2 can be installed to the maximum allowable tension limits without the need for additional vibration protection.

#### **FIND OUT MORE TODAY**

The ZTACSR/VR2 design is a patented Southwire exclusive. Visit [www.southwire.com/industries/utility](http://www.southwire.com/industries/utility) for more information.
